ORTHOPEDIC SERVICES

Talented doctors, advanced orthopedic procedures and faster recoveries.

Close to home.

Some of the region's leading orthopedic doctors and advanced techniques are available from the Orthopedic Program at Watsonville Community Hospital. These dedicated surgeons, together with our hospital team of professionals, combine skill and experience with advanced technology to deliver quality orthopedic care.

Advanced Orthopedic Services

We offer comprehensive inpatient and outpatient orthopedic care for everything from shoulders and spines to hips and knees to hands and ankles. A few of our specialties:

- Minimal incision joint replacements for knees and hips
- Reconstructive surgery
- Back and spine care, including treatment for degenerative disc diseases and spinal disc replacement
- Knee injury repairs
- Arthritis/Osteoarthritis treatment
- Sports injury management
- Pre- and post-surgery therapy
- Inpatient Rehab Unit
- Personalized care and attention
- Comprehensive, multi-disciplinary care

Rehabilitation

Specially-trained therapists at our on-site rehabilitation facility provide individualized physical and occupational therapy treatments, based on a physician's order. The goal is to help people overcome injuries to prevent surgery, and to help post-surgery patients regain mobility and return to active lifestyles as soon as possible.

Recovery

The recovery process is monitored during outpatient treatment or throughout the hospital stay by specially trained professionals who adapt care to each patient's needs. Many patients who have orthopedic procedures may require:

- Physical & Occupational Therapy
- Intensive therapy in the Inpatient Rehab Unit
- Case Management to help with a plan for follow-up care

Orthopedic Specialists

These orthopedic surgeons on WCH's Medical Staff could have brought their skills to any hospital, anywhere in the country. They chose the Orthopedic Center at WCH. We think you'll be just as impressed with their skill, commitment and dedication as we are.
